PROFESSIONAL SUMMARY

Software engineer with 5+ years building and shipping cross-platform mobile and web applications end to end with Flutter, Dart, Firebase, and Node.js/TypeScript. Currently Head of Engineering at We-Meet, leading an AI companion app and its parental oversight product across iOS, Android, and web, with real-time Gemini features and Stripe and RevenueCat subscription billing. Delivered 10+ production apps at Zee Palm, progressing from Assistant Consultant to Flutter Developer to Senior Software Engineer and Team Lead, running code reviews and mentoring junior developers. Co-founded two generative AI products, owning architecture, release quality, and App Store and Play Store deployments.

PROFESSIONAL EXPERIENCE

- **We-Meet** Contract · Remote · Hong Kong
 - **Head of Engineering** · Nov 2025 – Present
 - Lead Flutter engineering for Kumatomo (AI companion for kids) and KumaGuardian across iOS, Android, and web.
 - Own app architecture, state management, release quality, and store deployments to the App Store and Play Store.
- **Zee Palm (LLC)** Hybrid · Pakistan
 - **Senior Software Engineer & Team Lead** · Feb 2022 – Feb 2026
 - Delivered 10+ production Flutter apps for mobile and web, focused on performance, scalability, and clean UX.
 - Integrated Firebase Auth/Firestore/Storage/Functions, FCM push, and Stripe/RevenueCat billing; managed FVM versioning.
 - Ran code reviews, mentored junior Flutter developers, and standardised FVM versioning across the team.
 - **Flutter Developer** · Dec 2021 – Sep 2022
 - Built cross-platform Flutter features for client mobile apps on Firebase Auth, Firestore, and Storage.
 - Integrated third-party SDKs for real-time chat, search, and push notifications.
 - **Assistant Consultant** · Sep 2021 – Dec 2021
 - Joined supporting client project delivery, then moved into full-time Flutter development.
- **Spectoria LLC** Remote · Qatar
 - **Co-Founder & Lead Engineer** · Aug 2025 – Present
 - Co-founded Spectoria, a generative AI video/image platform with Flutter and Next.js clients.
 - Build generation UX, project dashboards, and credit billing on a Node.js + Firebase backend.
- **Art2Life** Remote
 - **Co-Founder & Development Head**
 - Co-build Art2Life, a Flutter AI photo/video app with 15+ creative modes and credit-based in-app purchases.
- **TECHONIQ** Contract · Remote · Pakistan
 - **Software Engineer** · Nov 2022 – Feb 2023
 - Built and shipped Flutter mobile app features on a short-term contract.

PROJECTS

- **Kumatomo** · kumatomo.com/v2 — AI companion for kids with parental controls, real-time Gemini chat, and subscriptions.
- **Spectoria** · spectoria.cc — Generative AI video/image platform with multi-model workflows and credit billing.
- **TrackerMax** — Workout tracker with exercise logging, progress charts, and Apple Health / Google Fit sync.
- **Affili-Fit** — Fitness platform with personalized meal and workout plans and wearable integration.
- **Jobblish** — Freelance marketplace with real-time chat (Stream) and Stripe payments.
